

Reliable®

Model CR2 Commercial Riser

cULus Listed, FM Approved

Features

- Compact, light weight design
- Schedule 10 welded body (2" through 8")
- Schedule 40 welded body (1-1/4" and 1-1/2")
- Approved for vertical or horizontal installation
- Grooved components enable universal application

Product Description

The Reliable Model CR2 Commercial Riser arrives from the factory as an assembled unit complete with water flow switch, pressure gauge, and main drain as a cost-effective system riser or part of a floor control assembly. The modular design allows the upper and lower segments to be independently rotated for maximum flexibility in design and installation, and the unique 90 degree orientation of the main drain and pressure gauge permits the Model CR2 to be installed compactly in corners.

The Model CR2 is cULus Listed in all sizes and FM Approved in 2 in. to 8 in. (50 mm to 200 mm) sizes. The main drain is available with a ball valve or Reliable TD (Test and Drain) valve available with a wide selection of test orifice K-factor choices. An optional pressure relief kit with adjustable pressure relief valve (175 - 310 psi [12.1 - 21.4 bar]) is also available.

Model CR2 Commercial Riser

Table A

Valve Size	Pressure Rating	Material	End-to-End Take Out	Drain Size	K-Factor for Optional Test and Drain Valve*
1-1/4 (30mm)	300 psi (20.7 bar)	Schedule 40 Steel	13" (330mm)	1" (25mm)	2.8 (40) 4.2 (60) 5.6 (80)
1-1/2 (40mm)	300 psi (20.7 bar)	Schedule 40 Steel	13" (330mm)	1" (25mm)	
2" (50mm)	300 psi (20.7 bar)	Schedule 10 Steel	13" (330mm)	1" (25mm)	
2-1/2" (65mm)	250 psi (17.2 bar)	Schedule 10 Steel	13" (330mm)	1-1/4" (30mm)	2.8 (40) 4.2 (60) 5.6 (80) 8.0 (115) 11.2 (160)
3" (80mm)	250 psi (17.2 bar)	Schedule 10 Steel	13" (330mm)	1-1/4" (30mm)	
4" (100mm)	250 psi (17.2 bar)	Schedule 10 Steel	13" (330mm)	2" (50mm)	2.8 (40) 4.2 (60) 5.6 (80) 8.0 (115) 11.2 (160) 16.8 (240)
6" (150mm)	175 psi (12.0 bar)	Schedule 10 Steel	13" (330mm)	2" (50mm)	
8" (200mm)	175 psi (12.0 bar)	Schedule 10 Steel	13" (330mm)	2" (50mm)	

***Note:** K-factor must be equal to or less than the K-factor of the smallest K-factor installed on the sprinkler system. For sprinkler systems where the smallest K-factor sprinkler on the system is greater than the largest available valve K-factor, the use of any test orifice K-factor will provide at least a minimum flow of 10gpm (38 lpm) required to operate the UL Listed Waterflow Switch.

Size	A	B	C	D	E	F	G	H	Weight (approx.)
1-1/4" (30mm)	13" (330mm)	1-3/4" (44mm)	6-1/2" (165mm)	6-1/4" (159mm)	6-7/8" (175mm)	2-1/4" (57mm)	15-3/8" (391mm)	4-3/4" (121mm)	9 lbs (4.1 kg)

4" (100mm)	13" (330mm)	3-3/4" (95mm)	9-3/4" (248mm)	5-3/4" (146mm)	10-3/4" (273mm)	4-1/8" (105mm)	16-1/4" (413mm)	8-1/8" (206mm)	25 lbs (11.4 kg)
6" (150mm)	13" (330mm)	4-3/4" (121mm)	11" (279mm)	5-3/4" (146mm)	11-7/8" (302mm)	5-1/4" (133mm)	16-1/4" (413mm)	9-1/4" (235mm)	32 lbs (14.5 kg)
8" (200mm)	13" (330mm)	5-3/4" (146mm)	12-5/8" (321mm)	5-3/4" (146mm)	12-3/4" (324mm)	6-3/4" (171mm)	16-1/4" (413mm)	10-1/4" (260mm)	41 lbs (18.6 kg)

Notes:

- Dimensions will vary based on make-up tolerances.
- Shown with grooved inlet test and drain valve for 2-1/2" through 8" models. On 1-1/4", 1-1/2", and 2" models, test and drain valve has threaded inlet. All test and drain valves have an NPT outlet of the drain size described in Table A.
- For hydraulic calculations, use 1.08 feet equivalent length of respective pipe size, plus any loss required by NFPA 13 for the water flow switch.

Notes:

1. Dimensions will vary based on make-up tolerances.
2. For hydraulic calculations, use 1.08 feet equivalent length of respective pipe size, plus any loss required by NFPA 13 for the water flow switch.

Installation

The Reliable Model CR2 Commercial Riser shall be installed in accordance with the requirements of applicable NFPA standards and any authorities having jurisdiction. Failure to follow installation instructions and/or revisions to the arrangement of the devices may void the warranty and/or listing of the product.

Protect system from freezing temperatures. The Model CR2 and supply piping SHALL NOT be located in an area where exposure to freezing temperatures or mechanical damage may occur. Install the Model CR2 in an accessible and visible location that is maintained at or above a minimum temperature of 40°F (4°C).

Prior to installation, verify compatibility of the Model CR2 materials with the water supply and the environment where the valve will be installed.

Flow switch must be on the top portion of the piping. The flow switch may not be rotated more than 90 degrees from vertical.

Connect the inlet of the device to the water supply and the outlet of the device to the fire protection system. Ensure proper direction of flow using the diagrams contained in this bulletin and on the device. Drain should be piped to a location that will avoid damage to property and injury to personnel.

Relief valve is adjustable from 175 to 310 psi (12.1 to 21.4 bar). The pressure markings on the adjustment cap are for reference only. Use a system gauge to verify proper relief setting.

It is not necessary to remove the adjustable relief valve to perform a hydrostatic test. The adjustable relief valve may be adjusted temporarily to a pressure above the test pressure. Verify that the adjustable relief valve is returned to its normal setting after completing the hydrostatic test.

Maintenance

The owner is responsible for maintaining the fire protection system in proper operating condition. Any system maintenance or testing that involves placing a system out of service may eliminate the fire protection that is provided by the fire protection system. Notify any required authorities having jurisdiction and implement appropriate precautions prior to proceeding.

The Reliable Model CR2 Commercial Riser shall periodically be given a thorough inspection and test. NFPA 25, "Inspection, Testing and Maintenance of Water Based Fire Protection Systems," provides minimum maintenance requirements. Replace any components found to be corroded, damaged, worn or non-operable. Increase the frequency of inspections when the valve is exposed to corrosive conditions or chemicals that could impact materials and/or operation of the assembly.

Guarantee

Ordering Information

Specify:

1. Reliable Model CR2 Commercial Riser
2. Size
3. Drain Option (Ball valve or Test and Drain valve)
4. Test orifice K-factor (if ordering Test and Drain valve)
5. Optional Adjustable Pressure Relief Valve

Notes:

1. All Model CR2 Commercial Riser Assemblies come with a 300 psi (20.7 bar) pressure gauge for 175 psi (12.1 bar) applications. If the Model CR2 Commercial Riser Assembly is to be installed in a higher pressure application, please purchase a 600 psi (41.4 bar) (P/N 98248005) pressure gauge. This gauge may or may not be UL Listed at the time of purchase.
2. The water flow switch for the 1-1/4" (30mm) and 1-1/2" (40mm) Model CR2 is a proprietary component only available for replacement from Reliable. When ordering, please specify part number 96556923.

For International Use:

When using with 76mm and 165mm pipe, the following RASCO grooved transition couplings may be ordered:

76mm pipe with 2-1/2" (65mm) CR2: PN 7U99004002
165mm pipe with 6" (150mm) CR2: PN 7U99004003

Related Product

Reliable Streamline™ Drain Hoses are specifically designed for the Model CR2, FCA2, and other Reliable valve products, and offer a time- and money - saving option for the tedious work of making drain connections. Please reference Technical Bulletin 442 for additional information.
